Roll-up for managing corporate accounts

#### Collaboration

Discover new opportunities by sharing knowledge and ideas

OPS Manager promotes collaborative innovation by connecting people with operations. It gives teams access to all of the corporate knowledge and ideas needed to work together more effectively. OPS Manager ensures availability of notes, documents, pictures, and job status. This sharing of knowledge and ideas promotes innovation.

#### Organization

Reduce search time Improve efficiency

OPS Manager allows you to key stroke information once and electronically store all of the knowledge associated with a job. Action-item tracking throughout the process provides increased accountability. Transfer tasks, locate items, parts, assets, and more in seconds. OPS Manager uses a search engine in a paperless environment to find what you need fast.

#### Security

Protect information

OPS Manager protects your business knowledge (notes, documents, pictures, drawings, contracts, etc.) from loss, theft or accidental deletion. Also, role-based security grants users rights on a need-to-know basis.

Customizable and comprehensive reports

OPS Manager can be configured to accomodate the process of an operation

## **Operations Management Software**

#### Awareness

See real-time operational performance at a glance

OPS Manager provides comprehensive real-time profit margins and reports — equipping decision makers with the information needed to take immediate action. Individuals receive information necessary to make intelligent decisions regarding their task level activities. OPS Manager captures time spent on a task for operational efficiency.

#### Agility

Adapt quickly using a configurable system

Easily configurable, OPS Manager helps operations quickly adapt processes to new challenges and opportunities. Accessible by a standard web browser, implementation time for work stations is minimal — allowing for rapid deployment on a wide range of systems.

#### Balance

#### Manage workflow

OPS Manager streamlines workflow by automating and minimizing the number of paths a job may flow through an organization. Supervisors can prioritize and delegate tasks for more effective use of resources. Automated reminders ensure that personnel perform follow-up and future activities.
